

18 Aug 2015

To Whom It May Concern:

It is with great pleasure that I write this letter of recommendation for Mr. Alan Perez for a job position in your company/institution.

Alan was my student in the course CSE 455 (Software Engineering) in Winter 2013. This class is a unique class in that the student's grade is largely depended on the project deliverables. It is a project-oriented class. The class is organized as a mock software company where students are grouped into management and development teams. His role was a software engineer in a team that was assigned to build a prototype of the AlgorithmA (Algorithm Animation) project, which is an education mobile app that helps students in computer science understand algorithms and data structures. He has demonstrated mastery of software engineering concepts and principles in the development of large software projects that he obtained a solid "A" in the course. I would rank him as belonging to the top 1% of all undergraduate students I have taught in CSE 455 for last 25 years!

Alan is currently an intern in the Mobile App Development Team that develops mobile apps for the campus of California State University, San Bernardino. He is one of eight interns who are supported by the Information Technology Services (ITS) and the School of Computer Science & Engineering. The description of the mobile apps that were developed for CSUSB are found in the Web site www.csusb.edu and click on the mobile phone icon. He is the lead developer in the mobile apps, Red Folder and CaseAide. The former app is being developed for use by all 23 CSU campuses in California while the latter app is being developed for use in probably all counties of the State.

Alan is an excellent software engineer. His excellent skill as a team-player leaves me no doubt that he will be very successful in your projects. He is reliable and not afraid to learn new things. He learns fast and capable of independent study. He has very good work habits and well-liked and respected by his teammates.

I therefore strongly recommend Alan for the job position in your company/institution. If you have any questions, please do not hesitate to contact me at 909.537.5330 or at concep@csusb.edu

Sincerely,

Arturo I Concepcion, Ph.D.
Professor
